

Re-roofing

A high proportion of our work at P Phillips Contractors Limited is re-sheeting. Normally this is the result of storm damage or severe weather conditions.

We use a range of materials including: fibre cement, steel or composite sheets. All materials can be supplied in a variety of colours.

"We were very impressed with our new stables. P Phillips Contractors Ltd carried out a superb conversion and the new roof gave the building a very neat and pleasing finish"

P PHILLIPS CONTRACTORS LIMITED

Re-roofing *Continued*

At P Phillips Contractors Limited we carry out a cross section of sheeting work ranging from industrial units through to agricultural buildings, both old and new. We recently converted a barn to stabling for racehorses. Part of this conversion was to replace Onduline roofing with fibre cement sheeting.

P Phillips Contractors Limited is one of a very few companies in the area that is qualified to fit composite sheeting. This specialist material is insulated and individual sheets have to be welded together. Continuing investment in our staff ensures that we can provide a first class service to clients.
