

P PHILLIPS CONTRACTORS LIMITED

Steel Buildings

At Pat Phillips Contractors Limited we pride ourselves on excellent customer service. We ensure exacting specifications are met (and where possible exceeded) and all project deadlines maintained to guarantee a timely conclusion.

Our steel buildings are fabricated to meet the rigorous industry standards of BS5950 or BS5502 Class 2 (for industrial applications).

Only tried and tested materials are used, including treated timber or galvanised and painted steelwork. For cladding, either steel, fibre cement, insulated steel or a more bespoke material for a specialist application will be used.

We have over 25 years of experience supported by a wide range of client testimonials. A frequent service we provide is to ensure insulated steel buildings meet current regulations for crop stores and industrial units. Insulated composite panel sheeting comes in various sizes from 40mm to 100mm in a diverse range of colours. All internal finishes are white for a clean and spacious look and feel.

"Our farm buildings were brilliantly converted into light industrial units by P Phillips Contractors Ltd. The project included concreting, toilets, drains and all associated groundwork"
