

# P PHILLIPS CONTRACTORS LIMITED

## Timber Buildings

P Phillips Contractors Limited can construct new bespoke timber buildings or re-build character buildings.

Our team of specialist in-house carpenters are trained to high industry standards with many years of knowledge and experience.

Our staff will carry out all the necessary preliminary groundwork and construction using company machinery and equipment.

Through handling the whole project from beginning to end we eliminate any third party management issues, provide a consistent level of excellent service and ensure a competitive end cost to our customers.

We receive a high demand for new timber general-purpose buildings with a concrete base and outside aprons. These buildings are constructed with treated timber and all fixings are zinc plated.

We have replaced many fire-damaged buildings. All timber is treated and fixings are galvanised to provide a maintenance free life. Roof sheeting can be plastic coated box section, fire cement or tile/slate effect steel sheeting.

**"Due to fire damage we needed to urgently rebuild our barn for winter storage. We were delighted with our replacement barn. A first class job matched by an excellent service"**
